

Carlton Sykes House  
HO-853  
3497 Rogers Avenue, Ellicott City  
Howard County  
Ca. 1926  
Private

The Carlton Sykes House (ca. 1926) is an intact 1 1/2-story, wood-frame, side-gable, Sears, Roebuck and Company bungalow in excellent condition. The house is set on a steep hillside above Rogers Avenue adjacent to Howard County Government buildings and parking lots. The 41,294 square foot lot has a front yard with a lawn dotted with mature oak trees. The back yard is steeply sloped with rocky outcroppings and the property behind the house is densely wooded with trees and undergrowth. Constructed as a two-family home, the house is now used as a single-family house. The house is set on a stone cellar, has wood shingle siding, an asphalt roof, and retains its original wood six-over-one windows and wood doors. The house also retains most of its interior features, including original wood doors, trim, lighting fixtures, bathroom fixtures, built-ins, and 2nd floor kitchen fixtures.

3497 Rogers Avenue, the Carlton Sykes House, is significant as an unusually intact ca. 1926 Sears house. The house is the La Salle model two-family bungalow, which was constructed by Carlton Sykes and his son Guy Sykes. The two-generation family shared the house until Guy constructed his own house next door in the early 1930s.

## 7. Description

Inventory No. HO-853

---

### Condition

excellent       deteriorated  
 good             ruins  
 fair               altered

---

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The Carlton Sykes House (ca. 1926) is an intact 1 1/2-story Sears, Roebuck and Company, bungalow located northwest of the Ellicott City Historic District in Howard County, Maryland. Constructed as a two-family home, the house is now used as a single-family house. The house is set on a steep hillside above Rogers Avenue adjacent to Howard County Government buildings and parking lots. The 41,294 square foot lot has a front yard with a lawn dotted with mature oak trees. The back yard is steeply sloped with rocky outcroppings and the property behind the house is densely wooded with trees and undergrowth.

### House

#### *Exterior*

The Carlton Sykes House (ca. 1926) is an intact 1 1/2-story, wood-frame, side-gable, Sears, Roebuck and Company, two-family bungalow in excellent condition. The house is set on a stone cellar, has wood shingle siding, an asphalt roof, and retains its original wood six-over-one windows and wood doors.

The front facade of the Carlton Sykes House faces west. The fenestration pattern of the 1st floor consists of the main entry and a triple window. The main entry is composed of a wood front door with a fanlight over two panels flanked by three-light sidelights. A dormer with three window openings projects from the front roof slope. The cellar has three window openings, which are vertically aligned with the 1st story triple window. A front porch, with a brick foundation and steps, wood structure, and shed roof covers the main entry.

The south (side) elevation is built into the hillside with a garage entry at the cellar story. The 1st story has three window openings. The western opening lights the entry hall, the center opening is a double window that lights the kitchen. The eastern opening lit a bedroom (now part of the kitchen). The 2nd story has three irregular window openings that correspond to the interior floor plan. The western opening holds a single light window that lights the stair landing. The center opening holds a one-over-one stained glass window that lights the bathroom. The eastern opening lights the 2nd floor dining room (now a bedroom). A semi-circular vent is located in the peak of the gable. The cellar story has one window opening, which is vertically aligned with 1st story western window opening. A cellar door opening, which is vertically aligned with the 2nd story stair landing window opening, holds a wood door with four lights over three panels. The eastern half of the cellar has two garage door openings, which each hold a pair of swinging wood paneled garage doors in a six-light over three-panel configuration.

The east (rear) elevation has a 1-story, ca. 1940s wood screened porch on stone piers across the facade. The 1st floor fenestration pattern consists of a small bathroom window flanked by two back doors. The southern door opening holds a fifteen-light glazed door and leads to a space that was once a bedroom, now part of the kitchen. The northern door opening holds a fifteen-light glazed door and leads to a 1st floor bedroom. A dormer with three window openings and a door opening projects from the rear roof slope. The door opening holds a four light over three panel wood door that leads to the 2nd story kitchen. This door probably originally lead to an exterior stair that provided a separate entrance to the 2nd story unit. An exterior brick stove chimney is located on the northeast corner of the house.

The north (side) elevation has a 1-story bay that projects from the east two-thirds of the facade. The 1st-story bay has two paired window openings. The western bay of the 1st story has two small window openings that hold one-light windows. The 2nd story has one centered double window opening. A small window opening with a two-light window is located east of the double opening. A semi-circular vent is located in the peak of the gable.

#### *Interior*

The interior of the Carlton Sykes House remains remarkably intact. The floor plan is identical to that shown with the La Salle model in the 1926 Sears catalog with the exception that the published stair is cased within a separate entry hall. The Carlton Sykes House, on the other hand, has an open stair. Because the house was used originally by two generations of the same family, the need for separation was likely decreased. The only visible change to the floor plan since the house was built is that the demising wall between the kitchen and a back bedroom on the 1st floor has been removed and the kitchen enlarged. The house retains all of its original, unpainted, pine trim, doors, stair, and built-ins. Wood floors and plaster walls remain throughout. The bathrooms, including tile floors

# Maryland Historical Trust Maryland Inventory of Historic Properties Form

Inventory No. HO-853

Name  
**Continuation Sheet**

Number 7 Page 1

---

and walls, and original porcelain fixtures remain unaltered, as does the 2nd floor kitchen with original sink, cabinet, and built-in ironing board. The house also retains some original light fixtures.

## Site

Dramatic topography and mature trees distinguish the site of the Carlton Sykes House. The lot slopes steeply up from the street and the house is set on a plateau that is carved from the rocky slope behind the house. The drive is located south of the house and runs from the street to the garage. The stone for the foundation was likely harvested from the site. The lot is landscaped with a front lawn and small back lawn. Massive oak trees line the drive and roadway and the yard is dotted with additional specimen trees. The house has a house name sign along the drive that reads "Fair Oaks". Rock outcroppings break the sharp slope behind the house, which is overgrown with trees and brush. The Howard County property between the house and the parking lot behind the house is heavily wooded.

## 8. Significance

Evaluation for:

National Register  Maryland Register  not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

3497 Rogers Avenue, the Carlton Sykes House, is significant as an unusually intact ca. 1926 Sears house. The house is the La Salle model two-family bungalow, which was constructed by Carlton Sykes and his son Guy Sykes. The two-generation family shared the house until Guy constructed his own house next door in the early 1930s. The house retains most of its historic exterior and interior features, including original wood doors and windows, interior trim, lighting fixtures, bathroom fixtures, built-ins, and 2nd floor kitchen fixtures.

Between 1908 and 1940, Sears, Roebuck and Company sold complete houses, which were delivered as a kit of parts. The houses could be purchased through catalogs or in regional sales offices and were delivered to customers via rail. Sears marketed almost 450 models over the course of its "Modern Homes" program in the most popular styles, ranging from four-squares to bungalows to tiny cottages. Bungalows, such as the Carlton Sykes House, were the most enduring and popular typology.<sup>1</sup>

Sears sold houses in a variety of price ranges. The most expensive houses, including the La Salle model, were in the "Honor-Bilt" range. Honor-Bilt houses included pre-cut high-grade lumber and all the materials needed to complete the house, save the masonry foundation and interior plaster. The range of items integrated in the Sears house package included all the framing lumber, exterior sheathing, interior wood trim, built-in furnishings, plumbing fixtures, windows and doors, hardware, paint and stain, and even nails and fasteners. The average number of pieces, not including nails and screws, was 30,000.<sup>2</sup>

Sears published the La Salle Model in the 1926, 1928, 1929, and 1932 catalogs. Beginning in the 1920s, most of the Sears houses were designed by in-house architects, who designed houses from scratch, adapted popular models, or adapted published designs. Styles and plans were of the most accepted, rather than the most innovative, types. In 1926, Sears sold the La Salle for \$2,746. The two-family arrangement was unusual for Sears houses. The catalog noted that the "La Salle readily wins approval because of its classical and practical lines. It has conveniences generally found in higher priced bungalows. To a passerby The La Salle appears like an exclusive one-family residence."<sup>3</sup>

Sears also offered financing and promoted home-ownership. The catalog marketing clearly defines the pastoral American ideal that has historically been linked with suburban living. The 1926 Catalog states:

To get the full share of Good Health, Long Life, and Happiness for yourself and kiddies, to get the most out of life as our Creator intended it should be, A HOME OF YOUR OWN is an absolute necessity.

<sup>1</sup> Katherine Cole Stevenson and H. Ward Jandl. **Houses by Mail: A Guide to Houses from Sears, Roebuck and Company**, p. 19-32.

<sup>2</sup> Stevenson and Jandl, p. 29-32.

Number 8 Page 1

---

It promotes happiness and contentment, for it is the most pleasant and natural way to live. It has the correct environment made up of the natural instead of the artificial.

Green grass, trees, shrubbery, flower and vegetable gardens all your own, provide a pleasant pastime, and an abundance of the things we all crave. It is the real life that leads to happiness for you, and those you love.<sup>4</sup>

The bucolic character described in the Sears sales literature is well aligned with the surroundings that early 20th century suburban lots would have enjoyed in Howard County.

#### **Ownership and occupancy**

In 1924, Carlton and Mayanna Sykes purchased 12 acres along Rogers Avenue and constructed the La Salle model Sears house for themselves, their son, and his family. Carlton Sykes had previously owned a farm and dairy. In 1900, the household consisted of Carlton (aged 37), Mayanna (aged 35), their son Guy C. (aged 11) and their two African-American servants, Sarah Hill (aged 40) - their cook, and James Hall (aged 60) - their farm hand.<sup>5</sup> By 1910, Carlton (aged 47) had changed careers and was working as the Secretary of a Trust Company. Guy (aged 21) was a Civil Engineer's apprentice.<sup>6</sup> In 1930, the two-family house on Rogers Avenue was inhabited by Carlton (aged 67) - who worked as a bank cashier, Mayanna (aged 66), Guy C. (aged 41) - a civil engineer, his wife Grace (aged 37), their son G. Carlton (aged 15), their daughter Frances G. (aged 7), and Mayanna's brother, Walter (aged 76).<sup>7</sup> The Sykes subdivided the property over time and the Guy Sykes family moved out and built a house next door in the 1930s. The Carlton Sykes House remained in the family until 1946. Seven owners have owned the house since 1946. The current owner, Don Baier, has owned the house since 1993.

NINE ROOMS AND BATH—FOR TWO FAMILIES

**T**HE LA SALLE, colonial duplex or income bungalow, makes a worth while and high grade investment. It provides: (1) A home for the owner; (2) A steady income from rent of the other apartment. In the long run the owner finds such rental, actually pays for the investment. That's why the income bungalow is such a decided success.

The La Salle readily wins approval because of its classical and practical lines. It has conveniences generally found in higher priced bungalows.

The exterior has a colonial front porch, a sloping roof that continues over the porch, colonial windows and shutters. To pass by The La Salle appears like an exclusive one-family residence.

Can be built on a lot 30 feet wide

**FIRST FLOOR APARTMENT**

The Reception Hall. From the front porch you enter the reception hall, which is planned to be used for both apartments. It contains the main stairs to the second floor apartment, a door to the passageway, so that either family can reach the basement, or side entry.

The Living Room is of good size, measuring 16 feet 3 inches by 11 feet 3 inches, and so readily adapts itself to any furniture arrangement. Light and air are available from a triple window in the front and a high sash on the side.

The Dining Room. A pair of French doors divides the living room and the dining room. Size, 13 feet 5 inches by 11 feet 7 inches. Lighted by a double window.

The Kitchen. To the right of the dining room a swinging door connects with the kitchen. Floor space measures 9 feet 5 inches by 11 feet 7 inches. Contains place for range, sink and refrigerator, opposite which is a built-in cupboard. A double window provides light and ventilation. A door connects with the side entry, which has stairs to basement, and door to grade.

The Bedrooms. Directly off the dining room is a small hall that connects with the two bedrooms and bathroom. Each bedroom has a clothes closet, and two windows with cross ventilation.

The Bathroom has a built-in medicine case, and a window.

**SECOND FLOOR APARTMENT**

A door at the top of stairs connects with a hall which serves the living room, dining room and kitchen, bedroom and bath.

The Living Room measures 15 feet 2 inches by 11 feet 2 inches. It contains a spacious closet for a wall bed, giving a two-bedroom efficiency in a one-bedroom home. Three front windows flood the room with sunshine and air.

The Dining Room and Kitchen. This is really one room but the appearance of two rooms is obtained by the use of china cabinets, that divide the dining room and the kitchen as shown on floor plan. Size of dining room is 7 feet 11 inches by 11 feet 11 inches. It has a large closet, and is lighted by a double window. As stated above, two china cabinets form the opening to the kitchen. Size of kitchen, 7 feet 3 inches by 9 feet 8 inches. There is a space allotted for the sink, range, refrigerator, and containing built-in cupboards. A double window over sink provides light and ventilation.

The Bedroom measures 11 feet 5 inches by 13 feet 3 inches, and so accommodates twin beds. Has a roomy clothes closet and a double window.

The Bathroom. Centrally located off the hall. Has a built-in medicine case and a window.

The Basement. Room for a furnace for both apartments or a furnace for each apartment; also laundry and storage.

Height of Ceilings. First floor, 8 feet 6 inches from floor to ceiling. Second floor, 8 feet 6 inches from floor to ceiling. Basement, 7 feet from floor to joists.

**What Our Price Includes**

At the price quoted, we will furnish all the material to build this nine-room house, consisting of:

- Roofing, Best Grade Clear Red Cedar Shingles;
- Siding, Clear Cypress or Clear Red Cedar Bevel;
- Frame Lumber, No. 1 Quality Douglas Fir or Pacific Coast Hemlock;
- Flooring, Clear Grade Douglas Fir or Pacific Coast Hemlock;
- Porch Flooring, Clear Grade Douglas Fir or Pacific Coast Hemlock;
- Porch Ceiling, Clear Grade Douglas Fir or Pacific Coast Hemlock;
- Finishing Lumber, High Grade Millwork (see pages 110 and 111);
- We guarantee enough material to build this house. Price does not include cement, brick or plaster.
- See description of "Honor Bill" Houses on pages 12 and 13 of Modern Home Catalog.
- Interior Doors, Two Panel Design of Douglas Fir;
- Trim, Beautiful Grain Douglas Fir or Yellow Pine;
- Windows of California Clear White Pine;
- Medicine Case; Kitchen Cabinets;
- Colonial Shutters;
- Leaf Trough and Down Spout;
- 48-Lb. Building Paper; Sash Weights;
- Chicago Design Hardware (page 132);
- Paint for Three Coats Outside Trim and Siding;
- Varnish and Shellac for Interior Doors and Trim.

For Our Easy Payment Plan See Page 144.
